

IMPS Operations and Support Guide

DOC-019 | Version 3.7 | Access: Operations

Public ecosystem facts

NPCI describes IMPS as a real-time service available around the clock and publicly lists a Rs. 5 lakh per-transaction limit for channels other than SMS and IVR. See [source_register.md](#).

Synthetic bank-specific states

State	Meaning	Action
IMPS_ACCEPTED	Gateway accepted request	Monitor acknowledgement
IMPS_PENDING	No definitive result	Do not blind-reverse
IMPS_FAILED	Terminal failure	Verify debit state
IMPS_RECON_REQUIRED	External result unknown	Use reconciliation queue
IMPS_REVERSED	Financial impact reversed	Confirm ledger + notification

Support playbook

- Search by transaction ID and customer reference.
- Confirm whether funds were debited.
- Check switch response and reconciliation.
- Do not use public limits as a substitute for bank-configured product limits.
- Escalate pending cases using the severity matrix.
